About Us

International Gulf Trading Company WLL (IGTC), a member of Al Mana International Holding, was founded in the 1970's and quickly gained a firm reputation as a leader in the fire and security industry through outstanding service, quality products, and dedicated staff.

The company's strengths are underpinned by a global infrastructure, highly skilled and experienced workforce, diverse range of exclusive products and services, and a reputation for service excellence.

Recognized as one of the most respected names in high risk fire and security solutions, IGTC products are used by architects, designing consultants, HSE firms, fire brigades, security companies, consulting engineers, and consumers who demand a higher level of safety and security for their business and domestic premises.

We have provided fire, safety & security products and solutions to prestigious and high-risk installations around the country for more than 40 years.

Fire and theft, as well as exposed security risks and espionage can lead to significant losses and down time in any business and are crucial considerations to be taken for any company to maintain a productive and sustainable enterprise.

IGTC designs, installs, maintains, and supports equipment and systems utilizing the latest technologies specifically aimed at reducing the risks of such threats. Our team of surveyors and engineers can oversee the fire & security protection needs of multi-site corporations and industrial concerns, as well as small single site clients.

The current state of the safety, security, and firefighting markets is highly fragmented and fiercely competitive. Businesses are often looking to consolidate suppliers and prefer to select companies that can offer an extended range of services and products. Total capability companies such as IGTC continue to find such conditions ideal for growth.

Qualifications and Certifications

IGTC represents numerous principals from the U.S.A., UK, and Europe with an ever-increasing list of prestigious clienteles in both private and public sectors throughout the State of Qatar and the Gulf region.

IGTC have capabilities range from the provision of sophisticated fire fighting, fire detection & suppression systems for major high risk, high value strategic installations to smaller industrial, commercial, and domestic sites. Our company's authorized service technicians are hand-picked and trained by the Fire Industry Association to comply with BS and EN3 standards and criteria. Whether it is firefighting, fire & safety installations, physical security, electronic security, or training, IGTC is able to deliver excellence and expertise over the entire spectrum.

IGTC is ISO 9001: 2015 and ISO 14001: 2015 certified for both Quality and Environmental Management Systems, and also ISO 45001: 2018 certified, with the scope of Manufacturing of portable and mobile fire extinguisher. Supplying, installing, servicing and repairing fire, security, as well as Health & Safety equipment. Moreover, our approved listings from a reputable certifying body for firefighting equipment servicing and maintenance, assures our customers undeniable world-class standards.

IGTC has been supplying, installing, commissioning, and maintaining a wide range of fire & life safety systems at various projects throughout the country. Our Fire Sales & Service Representatives are FETA (Fire Extinguishing Trades Association) certified which have been approved by BSI (British Standards Institution) and BAFE (British Approval for Fire Equipment) as satisfying the requirement of BAFE SP101 (Competency of Portable Fire Extinguisher Organizations and Technicians), and the training clause of ISO 9001.

In accordance with mandatory state requirements, IGTC engineers and products are also certified and approved by Qatar Civil Defense Department for application and distribution in the state of Qatar.

Trading

The Trading Department of IGTC is capable of providing their customers with the very best of advice, consultation, solutions, quotations, and ongoing product and system support.

This type of service is typically known as a 'Full Package', but within IGTC, our level of service philosophy means so much more.

From the sale of a multi-million fire fighting vehicle, to the provision of a fire warning sign, IGTC will offer its customers the same dedicated level of service one would expect from a company who has been satisfying the needs of its customers for over 40 years.

Guests are welcome to view the quality of our chosen products and experience the warmth of our staff members from within our remodeled showroom in Doha, where customers can receive the very best of quality at a commercially competitive price.

FIRE FIGHTING

- Equipments
- Pumps
- Detection & Alarm Systems
- Suppression Systems

FIRE PREVENTION

- Fire Retardant Coating
- Smoke & Fire Curtains
- Fire Rated Doors

Most respected names in high risk fire and security solutions

IGTC products are used by architects, designing consultants, HSE firms, fire brigades, security companies, consulting engineers, and consumers who demand a higher level of safety and security for their business and domestic premises.

Fire Engineering

Our Fire Engineering Department has been designing, fabricating, installing, and inspecting fire fighting, suppression and detection systems of all types since the early 1980's. Our combined team knowledge and design capability helps us maintain our reputation as a leader in the fire protection industry and is a certified Fire Safety Contractor with Qatar Civil Defence.

The methodology that IGTC follows to manage their project development programme is internationally recognized and comprises of the following components:

- 1) Project Design
- 2) Project Execution
- 3) Project Controls
- 4) Quality Assurance
- 5) Project Management

This approach ensures consistency and reliability of the proposed systems and caters for the needs of each individual client.

IGTC values the importance of project management and the timing and succession of major activities,

♥ Fire Retardants / Coating

Highly flexible, totally weather and water resistant cable & construction joint coatings, as well as through penetration fire stopping that is compatible with various chemicals.

♥ Gas Clean Agent Extinguishing Systems

FM200, Novec, Argonite & NN100).

The most human friendly fire suppression agent with no adverse effect on the environment or systems it protects.

♥ Water Suppression Systems

Deluge systems, pre-action systems.

♥ Sprinkler System

Wet & dry, high & medium velocity deluge systems, as well as stand pipe, automated & manual water monitors, fire hose & hose reel systems.

♥ Foam Suppression Systems

Floating & fixed roof fuel storage systems, bladder tank deluge systems.

♥ Fire Pumps

Pentair, Bristol, Fairbanks Morse.

♥ Fire Detection & Alarm Systems

Conventional & Addressable systems.

♥ Fire & Smoke Curtains

Coopers Evacu8, Constantina, D180/100, D200E, D6100

Maintenance

IGTC offers a complete line of services that include inspection, maintenance, repair, recharging, and testing of portable fire extinguishers, fire fighting systems, fire pumps, fire suppression & detection systems, alarm systems, and emergency/exit lighting.

We work closely with our clients to provide customized service agreements that give the right balance between the minimum requirements and best engineering practice. This enables accurate budgeting and minimizes the chances of unplanned costs for emergency call-outs and component repairs and replacements.

Our goal is to provide thorough services to the customer with attention to detail explanation of applicable codes and regulations, and how they apply to the customer.

We provide:

- All levels of maintenance, recharging, inspection, hydrostatic testing, and repairs of all types of portable fire extinguishers.
- Monthly inspection of fire extinguishers in commercial and industrial applications to comply with the requirements of OSHA 1910.157, and NFPA 10 Standards.
- All levels of maintenance, recharging, inspection and testing of carbon dioxide (CO₂), FM200, and Novec commercial and industrial fire suppression systems.
- Low- and high-pressure hydrostatic testing of self-contained breathing apparatus (SCBA), carbon dioxide (CO₂), nitrogen, etc. cylinders.
- All levels of maintenance, inspection and repairs of emergency and exit lights. Fire extinguisher training programs.
- Fire alarm system inspections, maintenance and repairs.
- Automatic fire sprinkler systems inspection, maintenance, and repairs. Fire Fighting Pumps.
- Fire Trucks & Ambulances.

METHODOLOGY

IGTC values the importance of project management and the timing and succession of major activities, deliverables, and milestones will be submitted as soon as the project kicks off.

Manufacturing

QATARI
PRODUCT

Our wealth of talent and depth of experience, combined with spotless, newly built, state-of-the-art manufacturing facilities, allow us to produce and supply a range of ORYX FIRE hand held portable Dry Chemical Powder, Water, Foam, Carbon Dioxide (Co2), Wet Chemical & Clean Agent fire extinguishers for the industrial, commercial, and private sectors.

As a licensed fire extinguisher and equipment manufacturer and supplier, IGTC guarantee locally manufactured equipment of the highest standard with superior strength and durability. Our cylinders are constructed of industrial grade steel and finished with exterior powder coating to resist harsh atmospheres and ensure a prolonged service life.

We initiate systematic risk analysis and run strict quality tests to establish utmost performance of the assembly line, as well as each complete operating unit.

Production team has been trained and certified by the manufacturers of the on line assembly machine. Yearly local training is also done. Equipment is sent to BSI for original testing and Kite Mark Approval. Yearly samples are sent to BSI for re testing. This satisfy the training requirement for SP101 and ISO 9001. The BASF SP101 scheme is to ensure that the originations and technicians are competent to provide the correct manufacturing standard's

Project Scope

Design, Supply, Installation, Testing & Commissioning of Fire Fighting. Fire Alarm & FM200

Dohalive Hotel

Project Scope

Design, Supply, Installation, Testing & Commissioning of Fire Curtain. The Dohalive project introduces a unique opportunity by fusing a mixed-use-225 key-5 Star quality hotel, with specialty restaurants at various levels, a modern business center, meeting and conference facilities, as well as a health club, spa and lap pool, swimming pool, shisha bar and rooftop entertainment area

Lusail Commercial Boulevard

Project Scope

Design, Supply, Installation, Testing & Commissioning of FM 200 Fire Suppression System (BP-18A).

Trade Reference

Ferrara Industrial Foam Pumper

Supply Scope

Supply, Testing & Commissioning and training of Ferrara Industrial Foam Pumper to Qatar Energy - Messaeed . The vehicle is equipped with Apparatus 3000 GPM Hale 8F Pump, 2000-gallon foam cell and 500-gallon water.

Oryx Fire Extinguisher

Supply Scope

Supply of 6KG Dry Powder Extinguisher to Ministry of Interior -Civil Defense . Oryx Fire Extinguisher is a Product Made in Qatar. Aside from DCP Extinguisher, We also have Foam , Water , Carbon Dioxide and Clean Agent Portable and Mobile Fire Extinguisher

Bristol Uniforms (Jackets & Trousers)

Supply Scope

Supply of Fire Fighters Bristol Uniforms jackets & Trousers to Ministry of Interior - Civil Defense, Qatar Energy and Qatar Armed Forces

Ziegler Fire Fighting Vehicle

Supply Scope

Supply of 8 Units Ziegler Z6 Fire Fighting Vehicle to Qatar Armed Forces. The Vehicle is an airport firefighting and rescue vehicle that is suitable for all categories of airports.

Ziegler Portable Pumps

Supply Scope

Supply of Ziegler Ultra Power 4 (UP4) portable pump to Qatar Armed Force , Banana Island (42 Units) The Ziegler UP 4 is a portable pump with VW 3 cylinder - 4 Stoke aluminum engine with electronic fuel injection, designed as a PFPN 1000-10 or 1500-10, tested in accordance with DIN EN 14466 and ONORM EN 14466

Ziegler Medium Rescue & Hazmat Vehicle

Supply Scope

Supplied 5 units Ziegler Medium Rescue & Hazmat Vehicle to Qatar Armed Forces.

Akron Brass Monitor

Supply Scope

Supplied 15 units Akron Brass Mercury Quick Attack Monitor to MOI - Civil Defense.

Bronto Skylift 90HLA

Supply Scope

Supply Testing & Commissioning of Bronto Skylift 90 HLA to Ministry of Interior - Civil Defense. Bronto Skylift 90 HLA is superior to Vertical as well as horizontal outreach during rescue.

Chubbsafes Centurion LW – DD

Supply Scope

Supply Chubbsafes Centurion LW – DD as Main Vault Door for Al Khaliji Bank. Combines high resistance with emergency access without any loss of performance or compromising ergonomics. Certified by ECB•S and awarded the EN 1143-1 certification for burglary resistance as a grade V and VI

SafeStore 2000C

Supply Scope

Supply of Gunnebo SafeStore 2000C safety deposit locker for most branches of Commercial Bank of Qatar. Its a modern safe deposit locker system with attractively designed, permanently beautiful and highly secure lockers. Can be installed inside a vault or as a free-standing unit.

Biggest Customize Vault Door

Supply Scope

A company in Qatar ordered a customize vault door to secure important property and file was installed. It is said to be the biggest vault door ever made in Qatar.

Forster Presto and Thermfix Vario Fire Rated Glass

Supply Scope

Supply of Forster Presto and Forster Thermfix Vario to Qatar Petroleum. Forster presto is the complete profile system with fittings and accessories for flush-fitting single- and double-leaved doors, glazed walls, porches and windows which do not require thermal break. These elements stand for elegance and safety and satisfy the most stringent requirements with regard to extreme constant use. The system forster thermfix vario is a thermal insulated mullion and transom construction, based around a dry glazing security application system for fire, burglar and bullet protection

Gunnebu Bollard and Boom Barrier

Supply Scope

Supply of Gunnebu Bollard and Crash rated Boom Barrier to Amiri Guard. Gunnebu offers from the product family "Bollards" solutions for entries, where pedestrians may enter unhindered but vehicle traffic is to be stopped. The boom barrier consists of a robust steel construction and is designed for continuous use.

Maintenance Reference

Qatar Petroleum - MIC

Maintenance Scope

5 Years maintenance of Fire Alarm and Firefighting System at Qatar Petroleum - MIC

Qatar Petroleum District

Maintenance Scope

5 Years Ppm and reactive / corrective maintenance for fire Suppression, vesda, smoke curtains and all relevant systems at Qatar petroleum district.

Aspire Zone

Maintenance Scope

5 years Maintenance of Fire Detection and Suppression system in Aspire Zone

Qatar Public Schools (76 Schools)

Maintenance Scope

3 years Quarterly Maintenance Contract of Fire Alarm System , Firefighting System and Fire Extinguishers for Public Schools

Mwani Qatar

Maintenance Scope

3 years Maintenance of Fire Alarm and Firefighting System at Hamad Port.
